There are risks all around the globe – know where the biggest ones are.

This map shows our country risk scores. These scores are weighted average numerical indicators of the various peril-level scores that generate assessing risks associated with economic, sovereign, violence or other country-level factors.

1 Click a region on the map to see its risk score.

What Each Country Score Means

Country
Overall country risk assessment based on the various perils.

Sovereign
Health of government finances and potential for government default.

Macroeconomic
Economic conditions, including the risks stemming from external vulnerabilities.

Banking
Banking sector stress and solvency.

Political Violence
Politically motivated violence of any form.

Strikes, Riots, Civil Commotion
Protests and riots.

Terrorism
Attacks from terror groups within or outside of the country.

War On Land
Interstate conflict.

Currency Inconvertibility
Ability/inability to repatriate dividends, gains and investments proceeds due to a shortage of dollars, capital controls or other restrictions.

Expropriation
Nationalization or expropriation of private assets.
